

RACQUETBALL - The sport of a new generation

Dear Sir/Madam,

My name is Ross Harvey. I head up a group of passionate and growing people who love the game of racquetball and who are looking to develop this game across the world. Our complete belief is that racquetball is the greatest game/sport God has given to mankind - and our complete objective is to take this sport to its rightful place at the pinnacle of all sport!

My group contains racquet sport professionals, sales professionals and construction professionals. We have the ability and the desire to assist your members in bringing our game to your area - and in ensuring that this game grows among the populace - filling up their new courts with club members who will love the game and subscribe to it for the long term.

The essence of what we want to do is to replace one or several underperforming indoor tennis courts and to bring an entirely new sport to the fore, racquetball, and then to assist the club owners' efforts in developing a market among the the members of the immediate community. We have young, smart, dynamic people who love our game in place who are willing and able to come to your location(s) and mediate this initiative for the short, medium and even long term.

Attached to this message is another message which I would greatly appreciate you sending out to every indoor tennis/racquet sport facility in your country. I look forward to hearing from you and to working together with your federation and the indoor tennis clubs in your country toward bringing another great racquet sport forwards - and in the process assisting the clubs to become more profitable.

All my best,

GrowingRacquetball.com
